The Sub-Fund is incorporated in the Grand Duchy of Luxembourg and qualifying as an Undertaking for Collective Investment in Transferable Securities (UCITS) complying with the provisions of Part I of the 2010 Law.

Refer to Section 2, Section 5 and Section 16 of the Fund Summary for further information on features of the ILP Sub-Fund.

¹The ILP Sub-Fund is not classified as Excluded Investment Product.

The Sub-Fund aims to provide long term total return by investing in companies that may benefit from the transition to a low carbon economy, while promoting ESG characteristics within the meaning of Article 8 of SFDR. The Sub-Fund aims to do this with a lower carbon intensity and a higher environmental, social and governance (“ESG”) rating, calculated respectively as a weighted average of the carbon intensities and ESG ratings given to the issuers of the Sub-Fund’s investments, than the weighted average of the constituents of the MSCI AC World Net index.

The Sub-Fund does not intend to declare dividend.

Investment Strategy

The Sub-Fund invests in normal market conditions a minimum of 70% of its net assets in equities and equity equivalent securities of companies with revenue exposure to climate transition themes (“Climate Transition Themes”) which are domiciled in, based in, or carry out business activities in, or are listed on a Regulated Market in, any country including both developed markets and Emerging Markets. The Sub-Fund may also invest in eligible closed-ended Real Estate Investment Trusts (“REITs”). Climate Transition Themes may include, but are not limited to, renewable energy, energy efficiency, clean transportation and green buildings.

Investments in Chinese equities include, but are not limited to China A-shares and China B-shares (and such other securities as may be available) listed on stock exchanges in People’s Republic of China. Investments in China A-shares through Shanghai-Hong Kong Stock Connect and/or Shenzhen-Hong Kong Stock Connect may be up to 10% of the Sub-Fund’s net assets, and up to 10% of its net assets when investing through China A-shares Access Products (“CAAP”). The Sub-Fund’s maximum exposure to China A-shares (through Shanghai-Hong Kong Stock Connect, Shenzhen-Hong Kong Stock Connect or CAAP) and China B-shares is 20% of its net assets. The Sub-Fund will not invest more than 10% of its net assets in CAAPs issued by any single issuer.

The Sub-Fund normally invests across a range of market capitalisations without any capitalisation restriction.

The Sub-Fund will not invest more than 10% of its net assets in REITs.

The Sub-Fund may invest up to 10% of its net assets in units or shares of UCITS and/or other Eligible UCIs (including other sub-funds of HSBC Global Investment Funds).

The Sub-Fund may use financial derivative instruments for hedging and cash flow management (for example, Equitisation). However, the Sub-Fund will not use financial derivative instruments extensively for investment purposes. Financial derivative instruments may also be used for efficient portfolio management purposes.

The Sub-Fund may enter into Securities Lending transactions for up to 29% of its net assets, however this is not expected to exceed 25%.

The Sub-Fund is actively managed and does not track a benchmark. The reference benchmark for sub-fund market comparison purposes is MSCI AC World Net.

Key Risks

<p>WHAT ARE THE KEY RISKS OF THIS INVESTMENT?</p> <p>The value of the Fund may rise or fall. These risk factors may cause you to lose some or all of your investment.</p>	<p>Refer to Section 7.1 of the Fund Summary for further information on risks of the ILP Sub-Fund.</p>
<p>Market and Credit Risks</p>	
<p>You are exposed to Markets Risk The value of investments may be affected by uncertainties such as international, political and economic developments or changes in government around the world.</p> <p>You are exposed to Foreign Exchange Risk The underlying assets of the Sub-Fund may be denominated in currencies other than the currency of the share class you have invested into. The value of your investment may rise or fall in line with movements in the relevant exchange rates.</p>	<p>Refer to Section 7.2 of the Fund Summary for further information on market risk of the Underlying Sub-Fund.</p>
<p>Liquidity Risks</p>	
<p>The Sub-Fund is not listed in Singapore and there is no secondary market for its Shares. You can only redeem your investment on a Dealing Day through HSBC Life.</p> <p>Investment of the Sub-Fund’s assets in relatively illiquid investments may restrict the ability of the Sub-Fund to dispose of its investments at a price and time that it wishes to do so. This may result in a loss to the Sub-Fund.</p>	<p>Refer to Section 7.1 of the Fund Summary for information on liquidity risks of the ILP Sub-Fund and Section 9 of the Fund Summary for further information on Suspension of Dealings of the ILP Sub-Fund.</p>
<p>Product-Specific Risks</p>	
<p>You are exposed to Derivative Risk Financial derivative instruments may be leveraged and their prices can be very volatile. Investment in these instruments may result in losses in excess of the original amount invested. If the issuers of the derivative instruments default, or such securities or their underlying assets cannot be realized, or perform badly, investors may suffer substantial or, in certain cases, total loss of their investments. Governmental regulation and supervision of transactions on the OTC markets is generally lesser than of transactions on organised exchanges. Thus, investing in OTC derivatives involves higher counterparty risk and liquidity risk.</p> <p>You are exposed to Sector Risk The investments of the Sub-Fund may be limited to a relatively narrow segment of the economy. Hence, the Sub-Fund may not be as diversified as most mutual funds and may tend to be more volatile.</p> <p>You are exposed to Chinese Equity Risk Investing in China involves a greater risk of loss than investing in more developed markets due to, among other factors, greater political, tax, economic, foreign exchange, liquidity, market volatility (such as interest rate and price volatility) and regulatory risks.</p> <p>You are exposed to the risk of investing in China A-Shares through Shanghai-Hong Kong Stock Connect and/or Shenzhen-Hong Kong Stock Connect Investments through the Stock Connects are subject to additional risks, namely, quota limitations, suspension risk, operational risk, restrictions on selling imposed by front-end monitoring, recalling of eligible stocks, clearing and settlement risks, nominee arrangements in holding China A-shares and regulatory risk.</p> <p>You are exposed to the risk of investment in REITs Insofar as the Sub-Fund directly invests in REITs, any dividend policy or dividend payout at the Sub-Fund level may not be representative of the dividend policy or dividend payout of the relevant underlying REIT. The legal structure of a REIT, its investment restrictions and the regulatory and taxation regimes to which it is subject will differ depending on the jurisdiction in which it is established.</p>	<p>Refer to Section 7.2 of the Fund Summary for further information on specific risks of the Underlying Sub-Fund.</p>
