Such securities may be denominated in non-U.S. currencies and the USD. The Fund is likely to concentrate its investments in Asia, Africa, the Middle East, Latin America and the developing countries of Europe. The Fund may invest all of its assets in high yield securities that are in default with respect to the payment of interest or repayment of principal, or presenting an imminent risk of default with respect to such payments subject to a maximum of 15% of its assets in securities rated lower than B by Moody’s or S&P or equivalently rated by Fitch (or, if unrated, determined by the Investment Advisor to be of comparable quality). The Fund may use derivative instruments such as futures, options and swap agreements and may also enter into currency forward contracts. Derivative instruments may be used for (i) hedging purposes and/or (ii) investment purposes and/or (iii) efficient portfolio management. Key Risks								
WHAT ARE THE KEY RISKS OF THIS INVESTMENT? <p>The value of Shares of the Fund can go down as well as up and an investor may not get back the amount invested. These risk factors may cause you to lose some or all of your investment:</p>		<p>Refer to Section 7.1 of the Fund Summary for further information on risks of the ILP Sub-Fund.</p>						
Market and Credit Risks								
<ul style="list-style-type: none"> The Fund is subject to credit risk as it could lose money if the issuer or guarantor of a Fixed Income Security in which it invests, or counterparty to a derivatives contract, is unable or unwilling to meet its financial obligations. The Fund may invest all of its assets in high yield securities that are in default with respect to the payment of interest or repayment of principal, or presenting an imminent risk of default with respect to such payments. The Fund is subject to currency risk as changes in exchange rates between currencies or the conversion from one currency to another may cause the value of the Fund’s investments to diminish or increase. 		<p>Refer to Section 7.2 of the Fund Summary for further information on market risk of the Underlying Sub-Fund.</p>						

<ul style="list-style-type: none"> The Fund is subject to interest rate risk as the value of Fixed Income Securities held by the Fund is likely to decrease if nominal interest rates rise. 									
Liquidity Risks									
<p>The Fund is exposed to liquidity risk where it invests in derivative instruments which are difficult to purchase or sell. If a derivative transaction is particularly large or if the relevant market is illiquid, it may not be possible to initiate a transaction or liquidate a position at an advantageous time or price.</p> <p>The Fund is not listed in Singapore and you can redeem only on Dealing Days. There is no secondary market in Singapore for the Fund.</p>	<p>Refer to Section 7.1 of the Fund Summary for information on liquidity risks of the ILP Sub-Fund and Section 9 of the Fund Summary for further information on Suspension of Dealings of the ILP Sub-Fund.</p>								
Product-Specific Risks									
<ul style="list-style-type: none"> The Fund's use of derivative instruments is subject to the risks described in the Fund's Prospectus, such as liquidity risk, interest rate risk, market risk, credit risk and management risk. Derivatives will typically be used as a substitute for taking a position in the underlying asset. The Fund is subject to global investment risk as securities of certain international jurisdictions may experience more rapid and extreme changes in value. The Fund may be subject to high yield risk such as greater levels of interest rate, credit and liquidity risks than Funds that do not invest in such securities. The Fund is subject to emerging markets risk as it invests in securities of issuers based in developing economies which may present market, credit, currency, liquidity, legal, political and other risks different from, and potentially greater than, the risks of investing in developed foreign countries. The Fund may be subject to risks from directly investing in Fixed Income Instruments traded on China Inter-Bank Bond Market ("CIBM"). The Fund may be exposed to liquidity risks, settlement risks, default of counterparties and market volatility associated with CIBM. The CIBM rules are also relatively new and still subject to further clarification and/or changes. 	<p>Refer to Section 7.2 of the Fund Summary for further information on specific risks of the Underlying Sub-Fund.</p>
