CONFIGURE EDGE ON WINDOWS BROWSER

1. Edge browser is a default Internet browser and PDF viewer for Windows 10.
2. It does not have any support for ActiveX plug-ins. Therefore, the Acrobat/Reader plug-in won't work with Edge.
3. Edge has its own built in viewer that allows opening PDF documents in the browser window.
4. You can also configure Edge to be you default PDF viewer for PDFs saved locally on your PC.
