Upon specific life events, you have the option to boost your coverage by purchasing a new insurance plan with no additional health questions asked.

A few of such events are:

- 

Marriage

Birth or adoption of a child
- 

Purchase of a property

Payout Option

After you reach your multiplier coverage age, you may access your policy's cash value by exercising the option to receive annual payout for 10 years.

Choose payment terms that suit you

Premium term:	Premium frequency:
Pay your premiums for 10, 15, 20, 25 or 30 years.	Pay on a monthly, quarterly, semi-annual or annual basis.

Multiplier Benefit

Boost your coverage by a multiplying factor of 2.5, 3.5, 4.5 or 6 times and choose your preferred duration of your multiplier benefit — up to the policy anniversary year of your 65th, 70th or 80th birthday. This multiplied coverage will apply to your basic plan benefits, Accidental Death Benefit and all eligible riders (Early Critical Illness Benefit III and Critical Illness Benefit III).

Paying a little more goes a long way with the multiplier benefit

Here are indicative premiums for Alex, a 30-year-old male non-smoker, based on different multiplier permutations; assuming a basic sum assured of S\$50,000 and a premium payment term of 20 years.

Basic sum assured	S\$50,000											
Multiplier factor	2.5x			3.5x			4.5x			6x		
Multiplier coverage age	Till Age 65	Age 70	Age 80	Till Age 65	Age 70	Age 80	Till Age 65	Age 70	Age 80	Till Age 65	Age 70	Age 80
Monthly premium payable	S\$114	S\$116	S\$123	S\$121	S\$126	S\$141	S\$128	S\$137	S\$161	S\$135	S\$146	S\$179
Multiplier benefit	S\$125,000			S\$175,000			S\$225,000			S\$300,000		
	By paying as low as S\$7 more per month, Alex can increase his multiplier benefit by at least S\$50,000.											

You'll always have boosted coverage

Your multiplier benefit stays in effect for the basic plan benefits after you reach your multiplier coverage age, but reduces by 10% each year until it reaches 50%. This means that, for your basic plan benefits, you will always be entitled to coverage that is more than your basic sum assured.

- ³ An additional amount equivalent to 20% of the original sum assured of the Early Critical Illness Benefit III rider, subject to a maximum of S\$25,000 per life assured for each special condition or juvenile condition. This payout does not reduce the sum assured of the rider. The list of medical conditions covered can be found in the product summary.
- ⁴ This rider is only applicable to policies where the policyholder is not the insured person.

You may wish to seek advice from a Financial Planner before making a commitment to purchase the product. In the event that you choose not to seek advice from a Financial Planner, you should consider whether the product in question is suitable for you. Please refer to the general provisions for the exact terms and conditions, specific details and exclusion of this product. As buying a life insurance policy is a long-term commitment, an early termination of the policy usually incurs high cost and the surrender value, if any, that is payable to you may be zero or less than the total premiums paid. It is also detrimental to replace an existing life insurance policy with a new one as the new policy may cost more or have fewer benefits at the same cost. Buying health insurance products that are not suitable for you may impact your ability to finance your future healthcare needs.
